PROFESSIONAL SUMMARY

Full-stack software engineer, AI engineer, and startup founder with 3+ years building production-grade web, mobile, and AI products. Founder of REIVEX Technologies and co-founder of Binary Brains, with 20+ digital products shipped for clients across the US, Middle East, Africa, and South Asia, spanning real estate, healthcare, fintech, e-commerce, and manufacturing. Specializes in taking ideas from zero to production fast, building SaaS platforms, AI-powered tools, RESTful APIs, and full e-commerce ecosystems with clean architecture, scalable cloud deployment, and senior-level execution. Strong across React, Next.js, Node.js, Python, and modern AI and LLM tooling.

KEY ACHIEVEMENTS

- Winner, App Development category, CodeRush 2026 Hackathon, hosted by Google Developer Groups (GDG) at Information Technology University (ITU).
- Shipped 20+ production-ready digital products across real estate, healthcare, fintech, e-commerce, and manufacturing.
- Delivered software for international clients across the US, Middle East, Africa, and South Asia.
- Launched full production-ready MVPs in as fast as 35 days, and deployed ERP/HR suites running in 15+ companies.
- Built a country's first online marketplace and gamified platforms for international clients.

PROFESSIONAL EXPERIENCE

Founder, REIVEX Technologies (Self-employed)

Mar 2026 to Present

Lahore, Punjab, Pakistan

- Founded and lead a software studio that helps startups, SMEs, and enterprises turn ideas into scalable SaaS platforms, AI-powered tools, web and mobile apps, and e-commerce ecosystems, delivered end to end.
- Architect and ship production applications with clean, maintainable code and senior-level execution, launching production-ready MVPs in as fast as 35 days.
- Engineer AI-driven automation, including LLM features, autonomous agents, and RAG pipelines, integrated into client products.

Co-Founder, Binary Brains (Self-employed)

Aug 2025 to Present

Hybrid

- Co-founded a software development and digital solutions company delivering scalable products for global clients.
- Designed and deployed ERP and HR/inventory suites running in 15+ companies, streamlining operations and internal workflows.
- Directed software architecture and technical decisions across simultaneous web and mobile projects.

Freelance Product Builder & Technical Consultant (Self-employed)

Jan 2025 to Present

Lahore, Punjab, Pakistan (Remote)

- Delivered production-ready digital products for startups and businesses, including SaaS platforms, real estate tools, marketplaces, and automation systems.
- Launched gamified platforms for international clients and a country's first online marketplace, owning scope, team, and delivery.
- Developed conversion-focused e-commerce storefronts and cross-platform mobile apps for iOS and Android.

PROJECTS

PowerSell

Founding Engineer, 2025

Gamified real estate deal and lead management platform with role-based access control and real-time pipelines that track deals across acquisitions, dispositions, and closings, with conversion analytics and payout tracking to keep agents focused on revenue. *Tech: Next.js, TypeScript, Node.js, PostgreSQL, WebSockets.*

Live: app.powersell.io

Okasha Smart

E-Commerce Architect, 2024

Custom Shopify storefront for a smart-home and IoT brand selling WiFi, Zigbee, and automation devices across Pakistan. Built a product-first, responsive catalog spanning switches, sensors, purifiers, and lighting, supporting a store with 230+ customer reviews and multiple retail branches. *Tech: Shopify, Liquid, JavaScript, Tailwind CSS.*

Live: okashasmart.com

HBD MM

iOS Engineer, 2026

Native iOS game and lifestyle app designed and shipped to the Apple App Store for an international client, with a clean SwiftUI interface and CloudKit data sync. *Tech: Swift, SwiftUI, CloudKit.*

Live: [Apple App Store](https://apps.apple.com)

India Rare

Product Engineer, 2026

Conversion-focused, fully responsive direct-to-consumer e-commerce storefront with multi-region international admin panels for catalog and order management. *Tech: Next.js, React, TypeScript, Tailwind CSS.*

SolarMax Marketing Platform

Full-Stack Engineer, 2025

Marketing platform with a custom frontend and backend for a solar energy brand, featuring content-driven pages, lead capture, and an admin-managed content system. *Tech: TypeScript, Node.js, React.*

SweetTreats

Mobile Developer, 2025

Cross-platform food and drink ordering app for iOS and Android that lets users browse menus, customize orders, and manage selections with real-time data. *Tech: React Native, TypeScript, Firebase.*

Enterprise ERP, Inventory & Internship Management Systems

Full-Stack Engineer, 2025 to 2026

Internal enterprise platforms including inventory and resource-management (ERP) tooling and an internship-management system that digitizes applications, tracking, and reporting, deployed across multiple companies. *Tech: Next.js, TypeScript, Node.js, PostgreSQL.*

EDUCATION

University of Engineering and Technology (UET), Lahore

Sep 2023 to Sep 2027 (Expected)

Bachelor of Science in Computer Science (Information Technology). Grade: A+.

Punjab Group of Colleges

Sep 2020 to Jul 2022

Intermediate in Computer Science (ICS).

LANGUAGES

English (Professional), Urdu (Native).
